

# REED SWITCHES

## FEATURES

- **Industry-leading high volume capacity**
  - Over 500M pcs/y production capacity
  - More than 8 billion units produced since 1964
- **High-quality and reliability**
  - Innovative surface treatment produces consistent quality
  - In-house designed production equipment (Plating, Sealing, Sorting, and Solder dipping machines)
- **Integrated production in Japan**
  - Flexible & swift production management
  - Data analyzation for producing the most stable, reliable, high-quality product
- **Solid Customer Support**
  - Rapid support for customers utilizing worldwide foot print of Standex group.
  - Strict on-time delivery

## PRODUCT LINES

- A wide-range of reed switches for low and high voltage
- Wide variety product lines
  - Standard
  - Miniature
  - Offset
  - High breakdown voltage
  - Transfer type etc.

| PRIMARY MARKET EXAMPLES (BUT NOT LIMITED TO) |                             |
|--|-----------------------------|
| AUTOMOTIVE                                   | AdBlue tank level sensor    |
|  | Brake oil level sensor      |
|  | Fuel level sensor and etc.  |
| HOME APPLIANCE                               | Door sensor for white goods |
|  | Humidifier level sensor     |
|  | Vacuum cleaner and etc.     |
| INDUSTRY                                     | Water meter                 |
|  | Gas Meter                   |
|  | Level Sensor and etc.       |

| CAPABILITIES                                      |
|---|
| Various Automatic Manufacturing Machines          |
| Stable Ultra High Yield Production                |
| Rhodium Surface Deactivation Treatment Technology |
| Magnetic Flux Scanning Test                       |
| High Development Expertise                        |
